

# COLIBRI Ceiling

*Square ceiling diffuser with discs for supply air*

## QUICK FACTS

- Adjustable discs
- 100% flexible spread pattern
- Can be used for vertical air diffusion
- Swirl function
- Also available in the Extract air version
- Designed for modular suspended ceilings (595 x 595 mm)
- Quick Access diffuser face
- Easy to access
- ALS commissioning box with 1 or 2 changes in dimension between the inlet and outlet.
- Available in a version with low installation height
- Available in alternative colours

# Technical description

## Design

The square supply air diffuser consists of a diffuser backing box and a diffuser face. The diffuser face is equipped with aerodynamically shaped, adjustable discs. The diffuser face is hung on hinges on one side and secured by springs on the opposite side. This Quick Access fastening system makes it simpler and quicker to open and close the diffuser face for installation, commissioning and cleaning. air diffuser is also available in a low version for installation in a ceiling void where low installation height is required. The air diffuser is then supplied without sleeve coupling.

## Materials and surface treatment

The backing box and diffuser face are made of sheet steel. The connection branch is made of galvanized sheet steel. The interior and exterior of the air diffuser is painted in our white standard colour, RAL 9003/NCS S 0500-N. The air diffuser is also available in alternative standard colours: Dusty grey RAL 7037, white aluminium RAL 9006, jet black RAL 9005, grey aluminium RAL 9007 and white RAL 9010.

The discs are made of plastic (PP-polypropylene).

## Accessories

### Commissioning box:

ALS. Made of galvanized sheet steel. Contains removable commissioning damper, fixed measurement tappings and sound absorbing material with reinforced surface layer, to Fire Resistance Class B-s1,d0 according to EN ISO 11925-2. Tightness class C on the housing according to SS-EN 12237 and VVS/AMA 12.

The commissioning box is also available in a low version for installation in a ceiling void where low installation height is required. The air diffuser is then supplied without sleeve coupling. The commissioning box is available with 1 or 2 changes in dimension between the inlet and outlet.

### Frame:

SAR K. For aesthetic installation of a lowered diffuser.

### Adapter:

ADAPTER, for adaptation to various variants and makes of systemized false ceilings: Ecophon, Gyproc, Dampa etc. Also used for adaptation to optional sizes of lay-in ceilings, for instance 625 x 625 or 675 x 675. Specification in separate product sheet for ADAPTER.

## Planning

The COLIBRI Ceiling is available with square dimensions of 595 x 595 mm in all connection sizes. This makes COLIBRI Ceiling very easy to install in 600 x 600 suspended ceiling modules. Position these directly down in the T-bar framework, and then secure them to the duct system or to the commissioning box. COLIBRI Ceiling is also available in a low version for installation in ceiling void where low installation height is required. See Figure 2.

## Installation

To dismantle the face (see Figure 1) prior to installing the air diffuser, insert a thin object, such as a Quick Access card or similar card, between the air diffuser face and backing box to release the springs. Then slide the card from the centre outward toward the corners.

The inlet spigot of the diffuser backing box can be secured to the connecting ducting by means of self-tapping screws or a blind rivets. For flush-mounting in fixed ceiling constructions, secure the diffuser by means of screws into place in the framework through either the sides or top of the diffuser backing box. The face and backing box in the version for low installation height must be centred and jointed together using the locking strip supplied. Secure the air diffuser in the correct position by means of self-tapping screws to the underside of commissioning box.

For mounting in modular suspended ceilings, it is advisable to select air diffusers with outer dimensions of 595 x 595 mm. Position these directly down in the T-bar framework, and then secure them to the duct system or to the commissioning box. If an ALS commissioning box is used, it must be secured to the building structure by means of hangers or mounting brackets.

The distance between the air diffuser and the commissioning box can be increased by as much as 500 mm with an ordinary circular duct without having to lengthen the measuring tubes and damper adjustment cords.

See Figure 2.

## Commissioning

Commissioning must be carried out with the diffuser face mounted. Pull out the measuring tubes and damper adjustment cords through the diffuser face discs. Connect a manometer to the measuring tubes. The desired commissioning pressure can be computed by applying the rated coefficient of performance of the air diffuser. Set the damper blade in the correct position and tie the damper adjustment cords in a commissioning knot to indicate the damper position.

Measurement accuracy and requirement on straight duct before the commissioning box, see Figure 2. The requirements of straight duct depends on the type of disturbance before the commissioning box. Figure 2 shows a bend, a dimensional change and a T-piece. Other types of disturbances requires at least 2xD straight (D = connection dimension) for measurement accuracy of  $\pm 10\%$  of the flow.

The rated coefficient of performance (K-factor) is specified on the identification label of the product and the relevant commissioning instructions are also available at [www.swegon.com](http://www.swegon.com).

## Maintenance

The air diffuser can be cleaned, if necessary, using lukewarm water with dishwashing detergent added. The duct system can be accessed after opening the diffuser face. If an ALS commissioning box is used, pull the distributor plate aside and then grip and twist the damper unit from of its mounting.

## Environment

The Declaration of construction materials is available at [www.swegon.com](http://www.swegon.com).

# Sizing

- The sound level, dB(A), values are applicable to rooms with an equivalent sound absorption area of 10 m<sup>2</sup>
- Throw I<sub>0,2</sub> is measured under isothermal discharge conditions.
- Recommended max. permissible temperature below room temperature is 14 K.
- For calculating the width of the air stream, air velocities in the occupied zone or sound levels in rooms with other dimensions, please refer to our web calculation softwares available for download at [www.swegon.com](http://www.swegon.com)

## Engineering graphs – COLIBRI CC

### Airflow – Pressure drop – Sound level – Throw

- The graphs illustrate data for COLIBRI Ceiling recessed in the ceiling.
- The graphs must not be used for commissioning.
- The dB(A) values are applicable to rooms with normal acoustic absorption of 4 dB.
- The dB(C) value is normally 6-9 dB higher than the dB(A) value.
- Throw for adjusting the swirl. For other adjustments, see the graphs for diffusers with the ALS commissioning box.

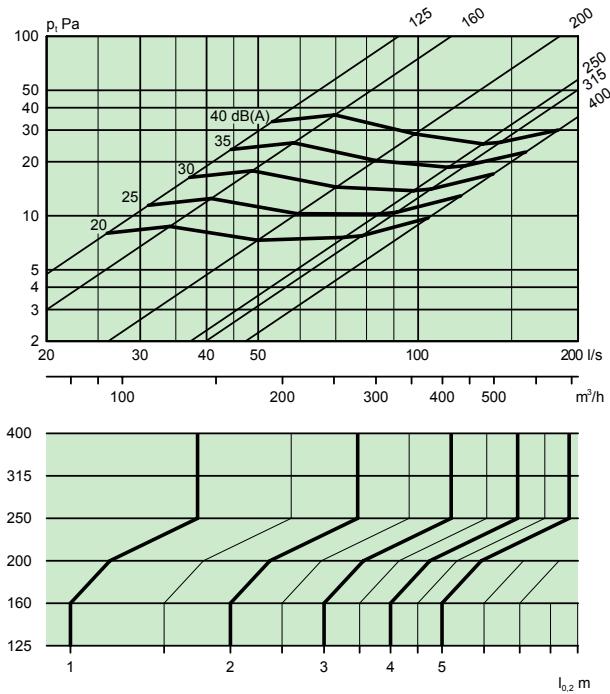

### COLIBRI CC, 125-400, 160-400 and 200-500

#### – Supply air

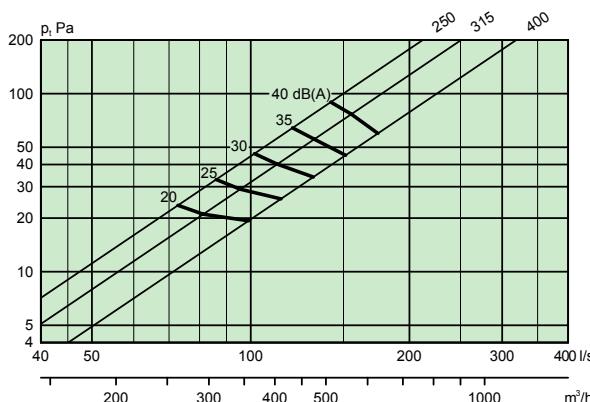

### COLIBRI CC 125-600, 160-600, 200-600, 250-600,

#### 315-600 and 400-600 – Supply air

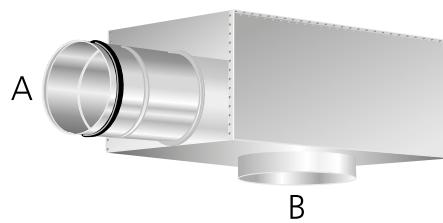

### COLIBRI CC 250-600, 315-600 and 400-600 – Extract air

## COLIBRI CC + ALS – supply air

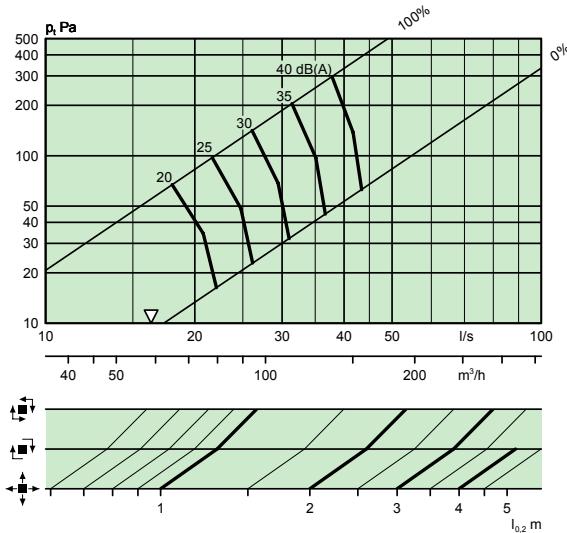

### Air flow – Pressure drop – Sound level – Throw

- The graphs illustrate data for COLIBRI Ceiling recessed in the ceiling
- The graphs must not be used for commissioning
- $\nabla$  = Minimum airflow required for obtaining sufficient commissioning pressure
- The dB(A) values are applicable to rooms with normal acoustic absorption of 4 dB.
- The dB(C) value is normally 6-9 dB higher than the dB(A) value.
- The version for low installation height generates approx. 3 dB(A) higher sound level than the value plotted in the graph.

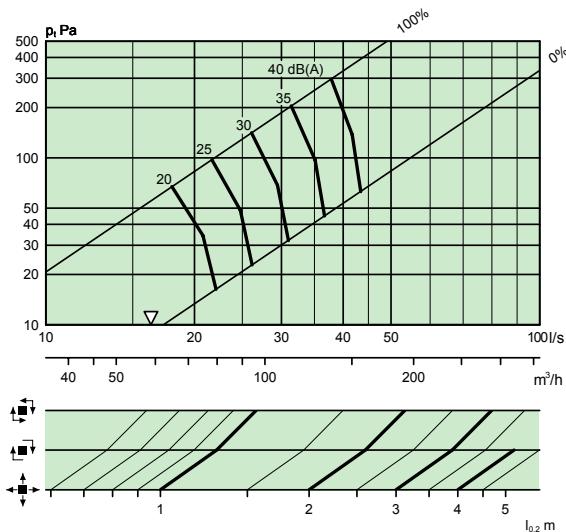

*Explanation of the step model:* • One step = One dimensional change between A and B, for example, A = Ø160 mm and B = Ø200 mm. • Two steps = Two dimensional changes between A and B, for example, A = Ø160 mm and B = Ø250 mm.

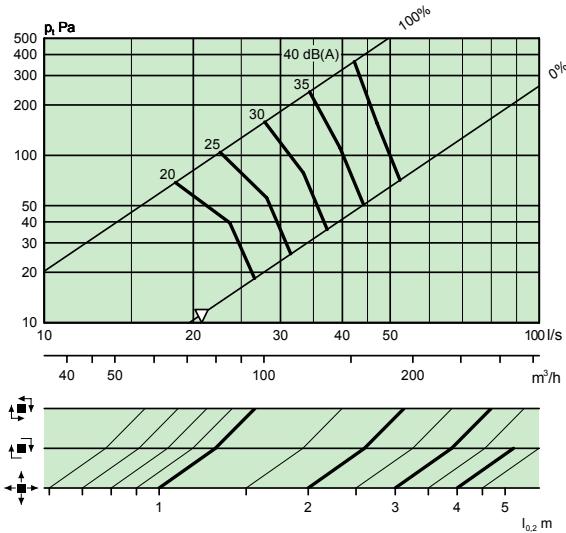

### COLIBRI CC 125-400 + ALS 100-125 – One step

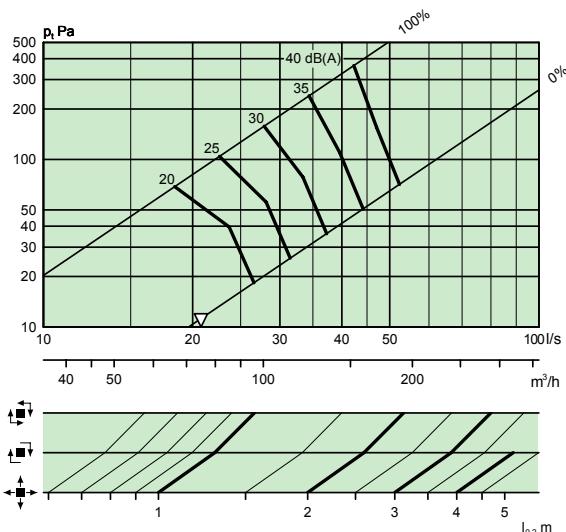

### COLIBRI CC 125-600 + ALS 100-125 – One step

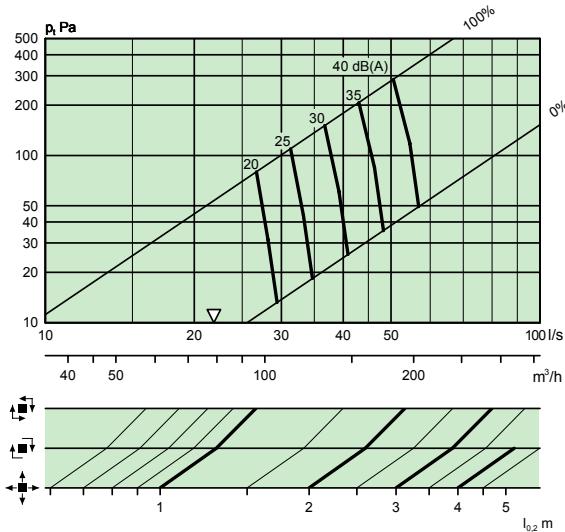

### COLIBRI CC 160-400 + ALS 100-160 – Two steps

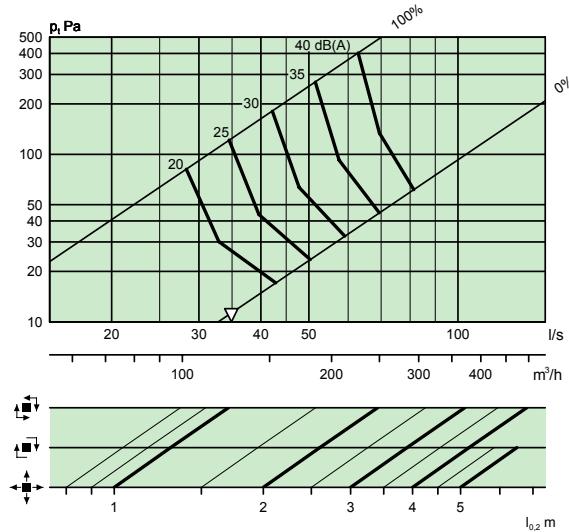

### COLIBRI CC 160-600 + ALS 100-160 – Two steps

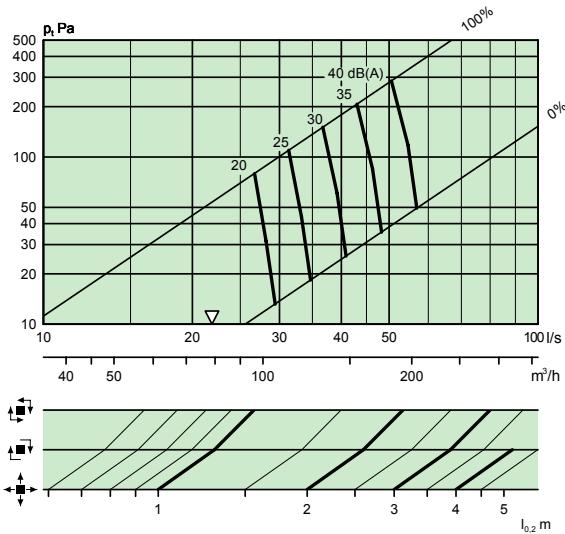

## COLIBRI CC 160-400 + ALS 125-160 – One step

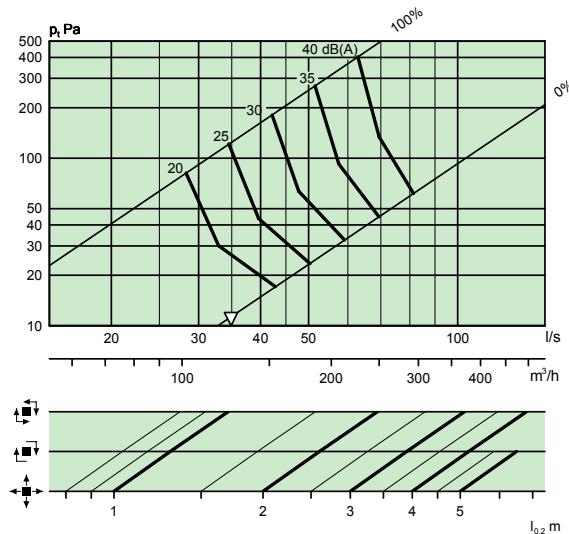

## COLIBRI CC 200-500 + ALS 125-200 – Two steps

**COLIBRI CC 200-600 + ALS 160-200 – One step**

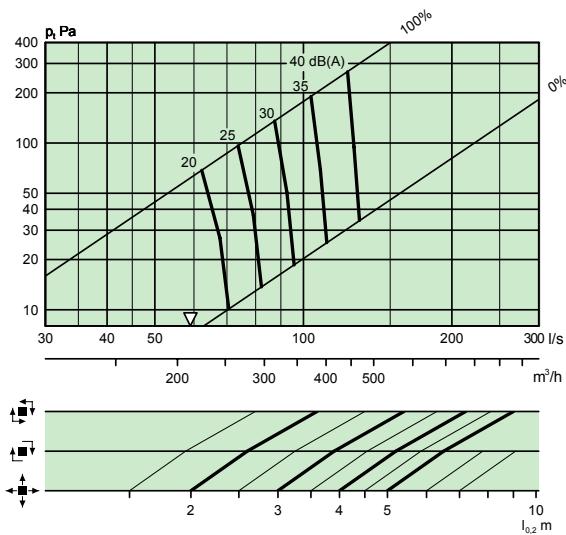

**COLIBRI CC 250-600 + ALS 200-250 – One step**

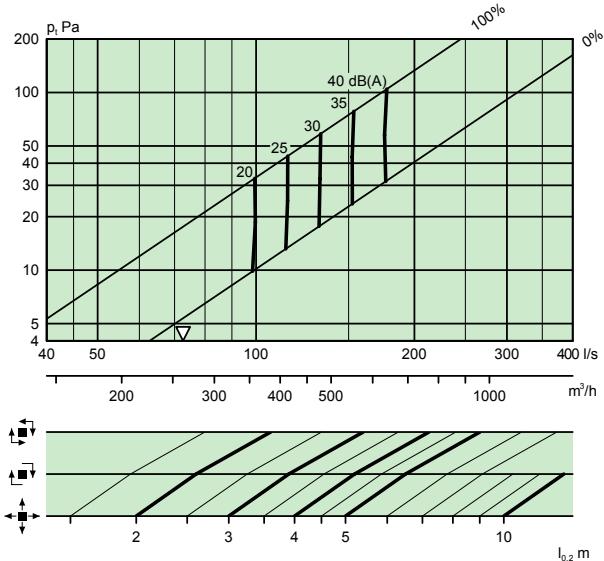

**COLIBRI CC 315-600 + ALS 250-315 – One step**

**COLIBRI CC 315-600 + ALS 200-315 – Two steps**

**COLIBRI CC 400-600 + ALS 315-400 – One step**

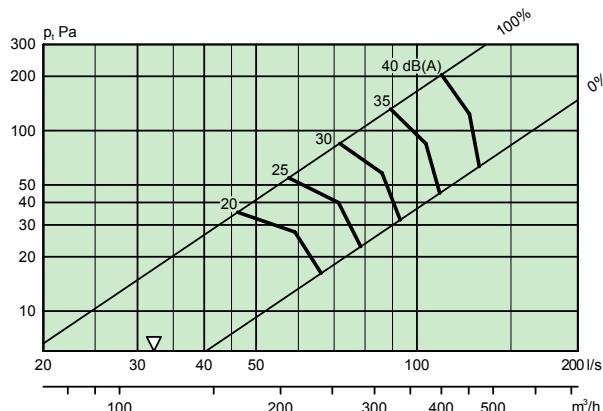

## COLIBRI CC + ALS – Extract air

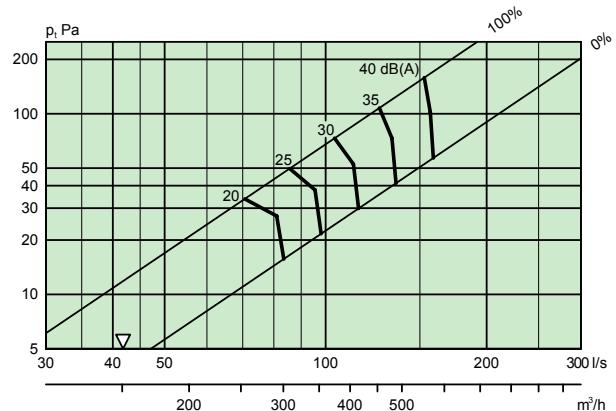

### Air flow – Pressure drop – Sound level

- The sound level, dB(A), values are applicable to rooms with an equivalent sound absorption area of 10 m<sup>2</sup>.
- For calculating the width of the air stream, air velocities in the occupied zone or sound levels in rooms with other dimensions, please refer to our web calculation softwares available for download at [www.swegon.com](http://www.swegon.com).

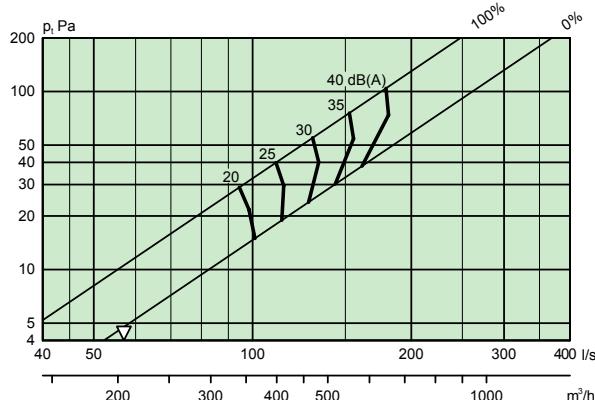

**COLIBRI CC 250-600 + ALS 200-250**

**COLIBRI CC 315-600 + ALS 250-315**

**COLIBRI CC 400-600 + ALS 315-400**

## Sizing

- The sound level, dB(A), values are applicable to rooms with an equivalent sound absorption area of 10 m<sup>2</sup>.
- Throw I<sub>0,2</sub> is measured under isothermal discharge conditions.
- Recommended max. permissible temperature below room temperature is 14 K.
- For calculating the width of the air stream, air velocities in the occupied zone or sound levels in rooms with other dimensions, please refer to our web calculation softwares available for download at [www.swegon.com](http://www.swegon.com).

## Engineering graphs – COLIBRI CR

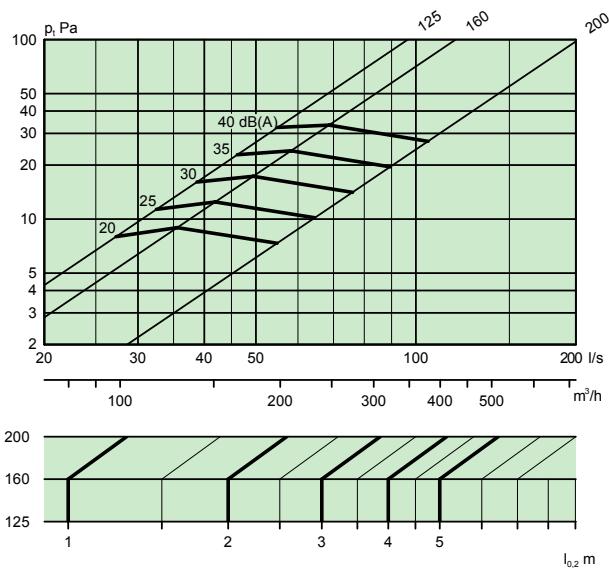

### Airflow – Pressure drop – Sound level – Throw

- The graphs illustrate data for COLIBRI Ceiling recessed in the ceiling.
- The graphs are not to be used for commissioning.
- The dB(A) values are applicable to rooms with normal acoustic absorption of 4 dB.
- The dB(C) value is normally 6-9 dB higher than the dB(A) value.
- Throw for adjusting swirl. For other adjustments, see the graphs for diffusers with the ALS commissioning box.

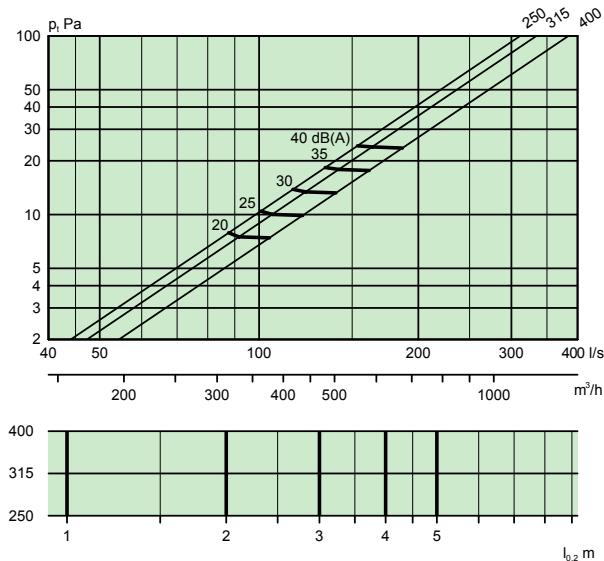

**COLIBRI CR 125-400, 160-400 and 200-500 – Supply air**

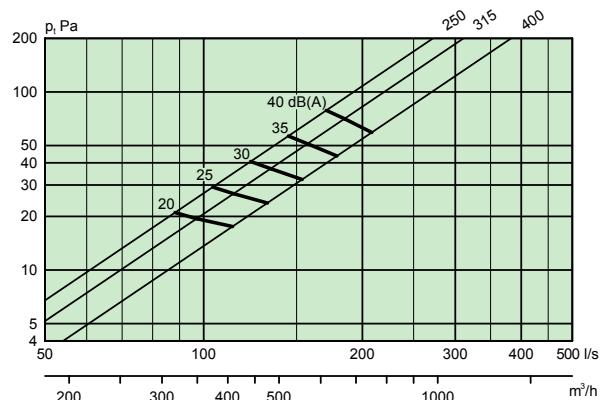

**COLIBRI CR 125-600, 160-600 and 200-600 – Supply air**

**COLIBRI CR 250-600, 315-600 and 400-600 – Supply air**

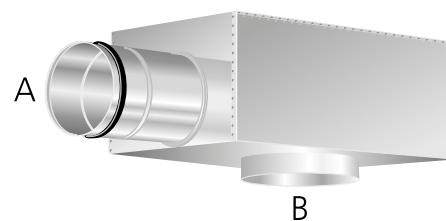

**COLIBRI CR 250-600, 315-600 and 400-600 – Extract air**

## COLIBRI CR + ALS – Supply air

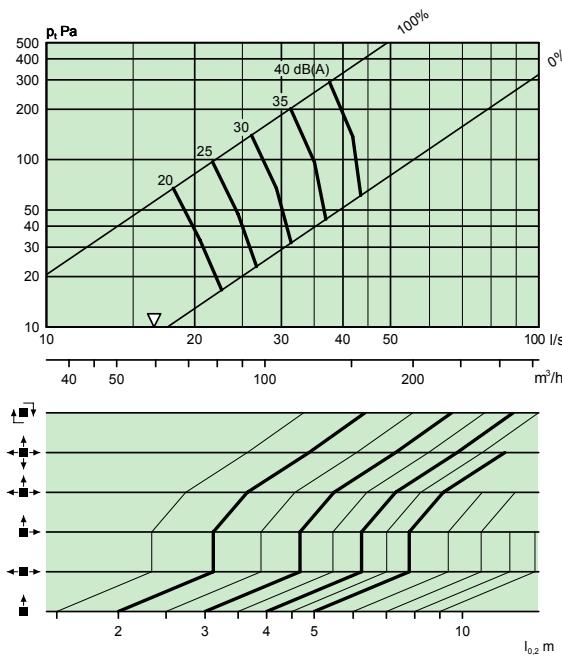

### Airflow – Pressure drop – Sound level – Throw

- The graphs illustrate data for COLIBRI Ceiling recessed in the ceiling.
- The graphs are not meant to be used in conjunction with commissioning.
- $\nabla$  = Min. airflow required for obtaining sufficient commissioning pressure.
- The dB(A) values are applicable to rooms with normal acoustic absorption of 4 dB.
- The dB(C) value is normally 6-9 dB higher than the dB(A) value.
- The version for low installation height generates approx. 3 dB(A) higher sound level than the value plotted in the graph.

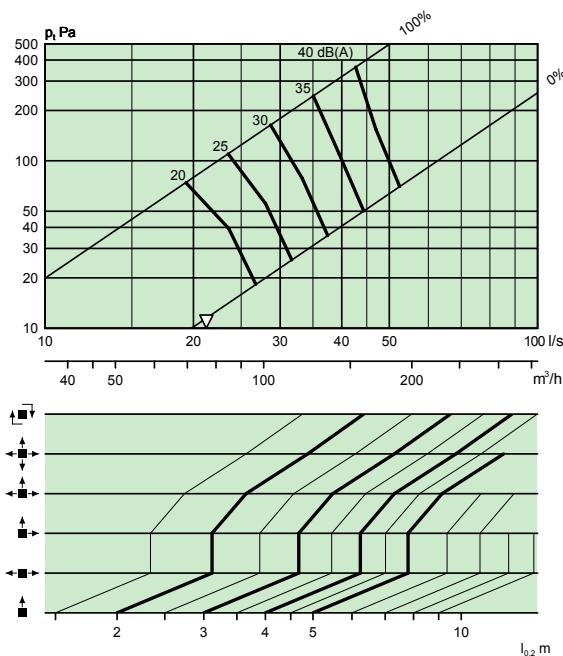

*Explanation of the step model:* • One step = One dimensional change between A and B, for example, A = Ø160 mm and B = Ø200 mm. • Two steps = Two dimensional changes between A and B, for example, A = Ø160 mm and B = Ø250 mm.

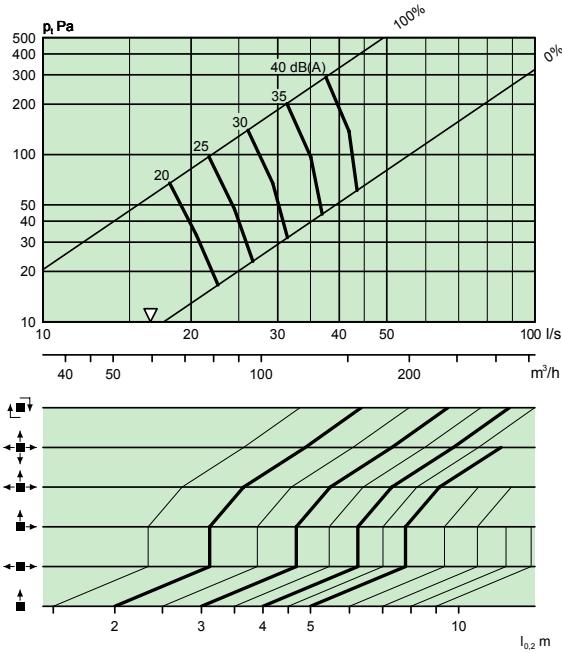

### COLIBRI CR 125-400 + ALS 100-125 – One step

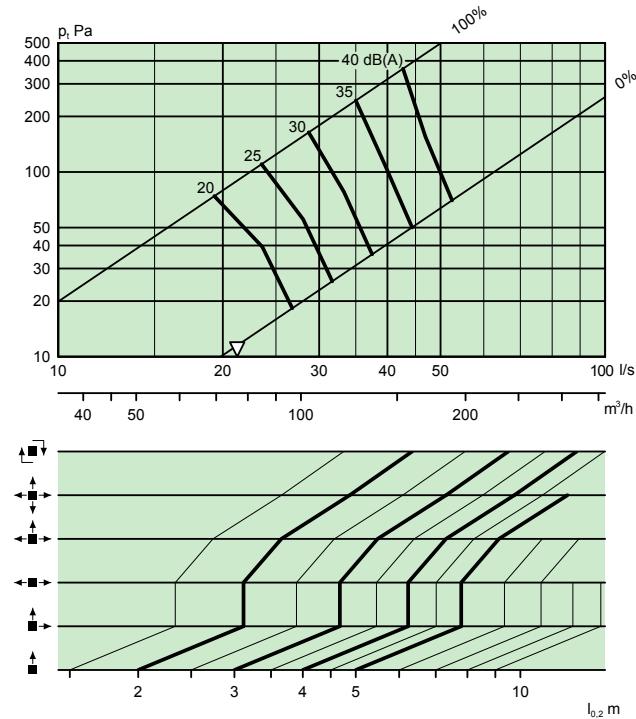

### COLIBRI CR 160-400 + ALS 100-160 – Two steps

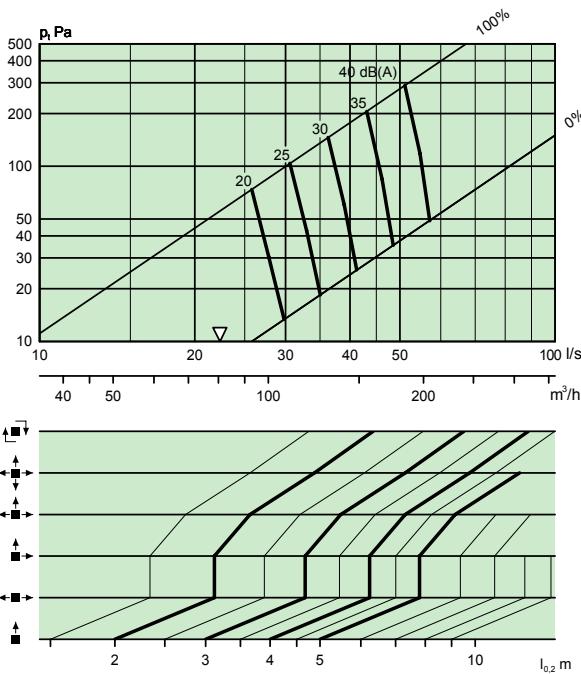

**COLIBRI CR 125-600 + ALS 100-125 – One step**

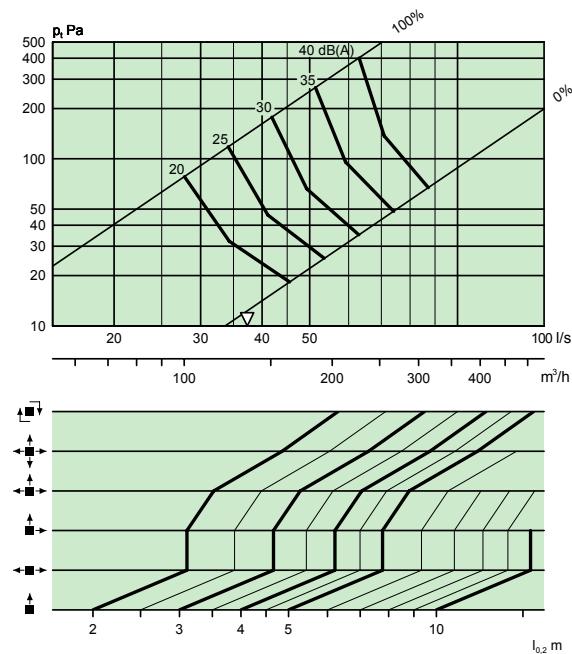

**COLIBRI CR 160-600 + ALS 100-160 – Two steps**

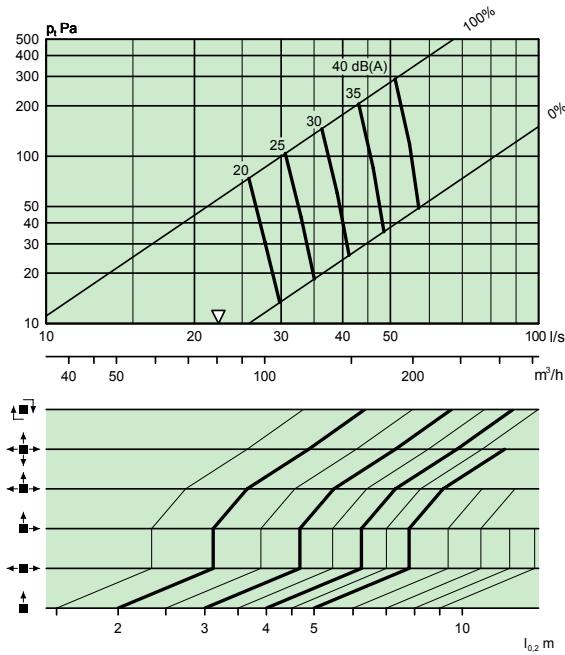

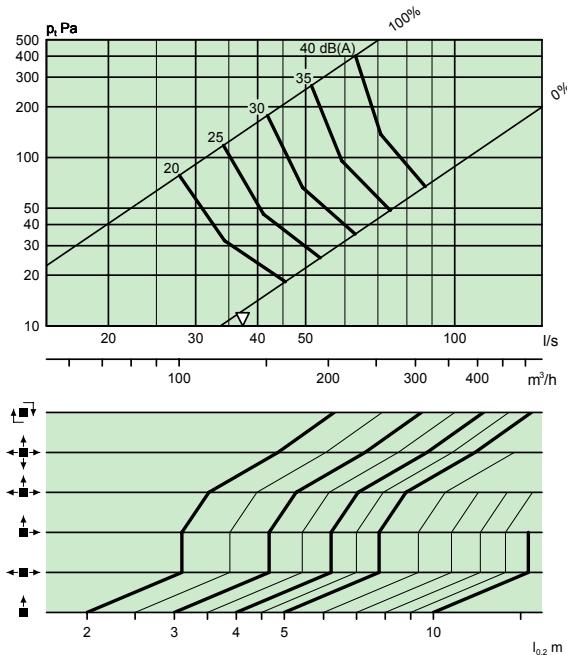

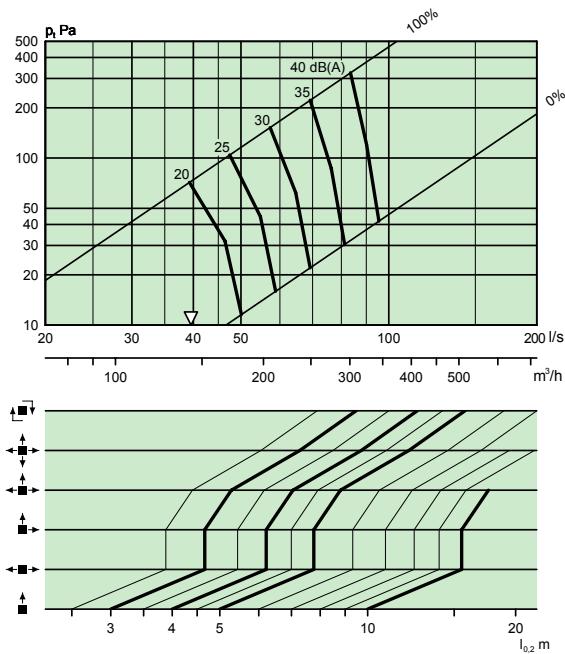

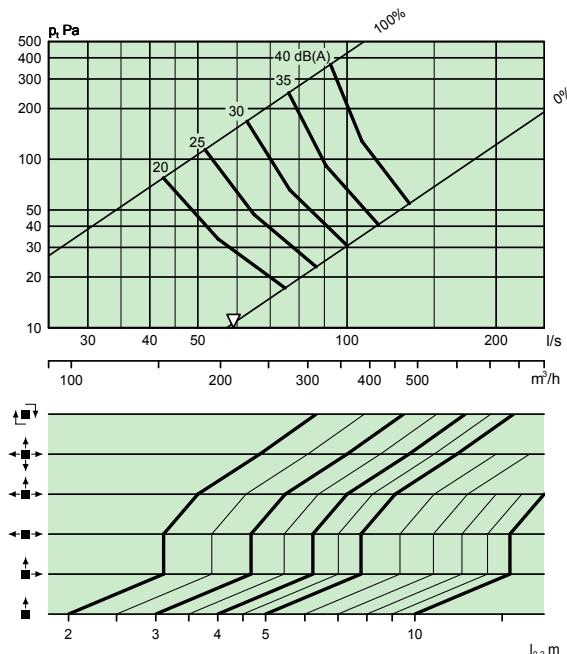

**COLIBRI CR 160-400 + ALS 125-160 – One step**

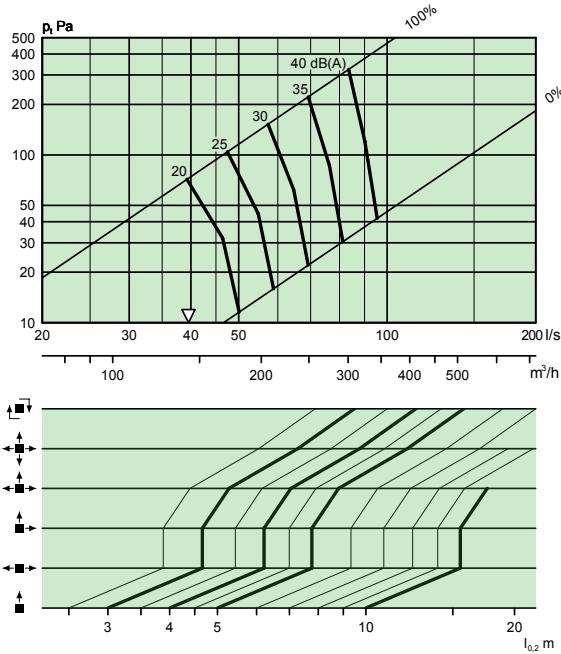

**COLIBRI CR 200-500 + ALS 125-200 – Two steps**

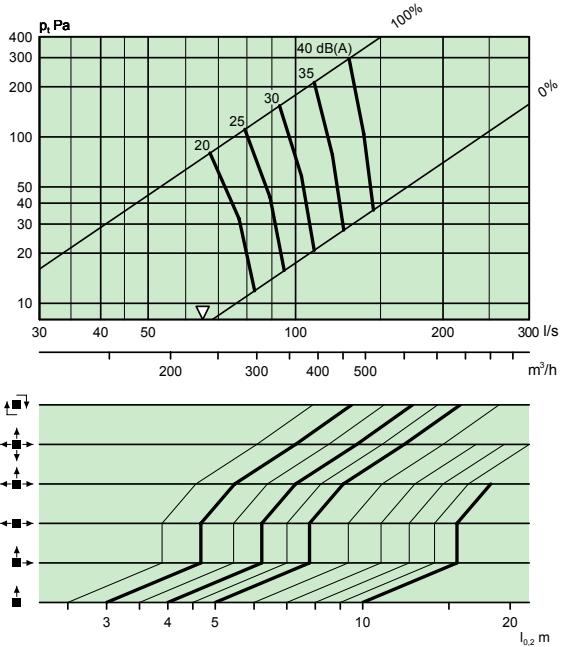

**COLIBRI CR 160-600 + ALS 125-160 – One step****COLIBRI CR 200-600 + ALS 125-200 – Two steps****COLIBRI CR 200-500 + ALS 160-200 – One step****COLIBRI CR 250-600 + ALS 160-250 – Two steps**

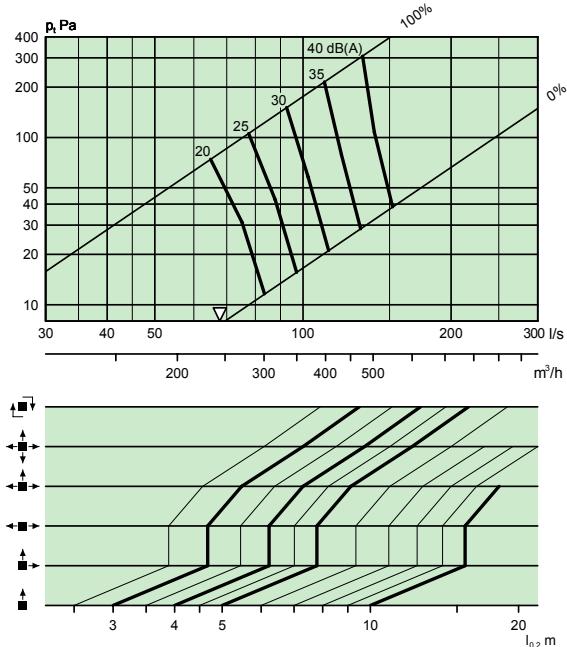

**COLIBRI CR 200-600 + ALS 160-200 One step**

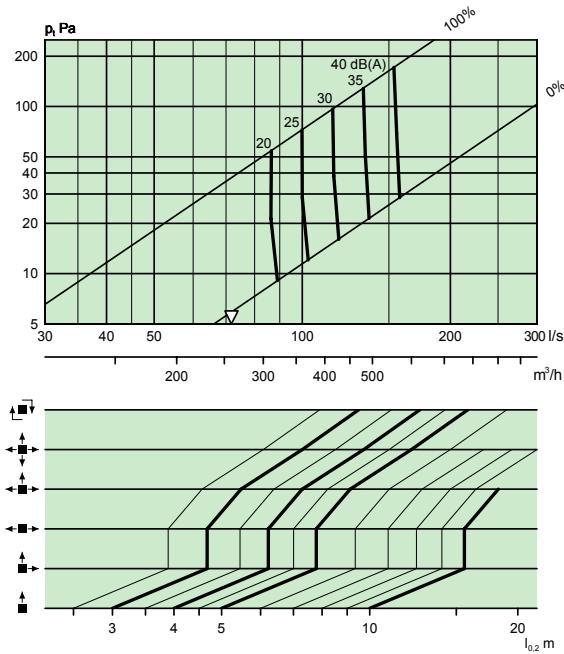

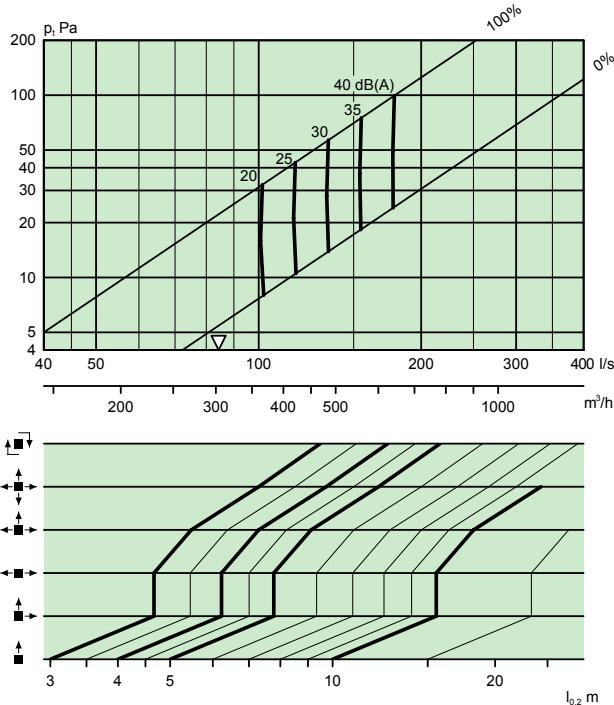

**COLIBRI CR 250-600 + ALS 200-250 One step**

**COLIBRI CR 315-600 + ALS 200-315 Two steps**

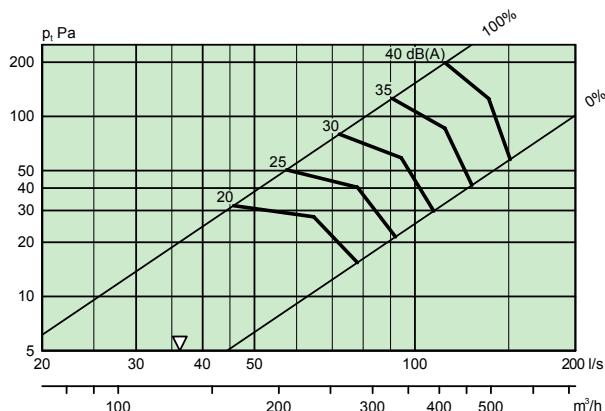

**COLIBRI CR 315-600 + ALS 250-315 One step****COLIBRI CR 400-600 + ALS 315-400 One step**

## COLIBRI CR + ALS – Extract air

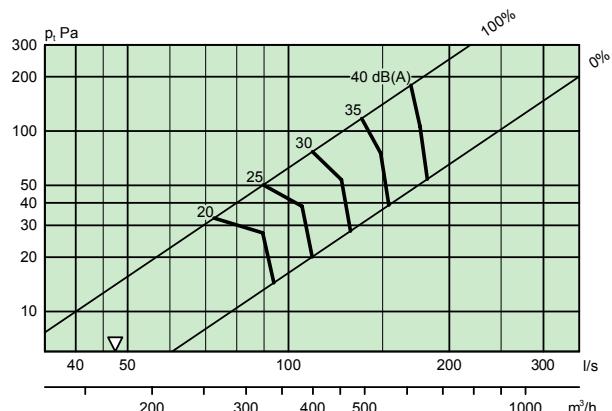

### Air flow – Pressure drop – Sound level

- The sound level, dB(A), values are applicable to rooms with an equivalent sound absorption area of 10 m<sup>2</sup>.
- For calculating the width of the air stream, air velocities in the occupied zone or sound levels in rooms with other dimensions, please refer to our web calculation softwares available for download at [www.swegon.com](http://www.swegon.com).

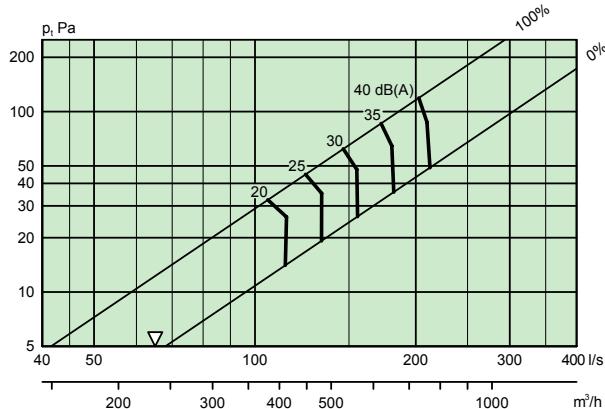

**COLIBRI CR 250-600 + ALS 200-250**

**COLIBRI CR 315-600 + ALS 250-315**

**COLIBRI CR 400-600 + ALS 315-400**

# Dimensions and weights

# Order key

## Product

Square ceiling diffusers for supply air      COLIBRI XX b -aaa -bbb -c

Variant:  
CC: Circular disc arrangement  
CR: Square arrangement

Version:

Nom. connection size, mm:  
125, 160, 200, 250, 315, 400

Nom. square dimensions, mm: 400, 500, 600

Low version: L  
To be specified only if low installation height is desirable  
(all sizes except 400-600)

Standard range:

|      |         |
|------|---------|
| Size | 125-400 |
|      | 125-600 |
|      | 160-400 |
|      | 160-600 |
|      | 200-500 |
|      | 200-600 |
|      | 250-600 |
|      | 315-600 |
|      | 400-600 |

## Accessories

Commissioning box      ALS d -aaa-bbb -c

Version:

|                     |         |
|---------------------|---------|
| For COLIBRI Ceiling | ALS     |
| 125-400 and 125-600 | 100-125 |
| 160-400 and 160-600 | 100-160 |
| 160-400 and 160-600 | 125-160 |
| 200-500 and 200-600 | 125-200 |
| 200-500 and 200-600 | 160-200 |
| 250-600             | 160-250 |
| 250-600             | 200-250 |
| 315-600             | 200-315 |
| 315-600             | 250-315 |
| 400-600             | 315-400 |

Low installation height: L

Low installation height should only be specified if  
a diffuser in the low version is selected.

# Specification example

SD XX

Swegon's complete square type COLIBRI Ceiling disc diffuser with circular disc arrangement and ALS commissioning box and the following features:

- Designed for modular suspended ceilings (600x600 mm)
- 100% flexible spread pattern
- Individually adjustable discs
- Quick Access diffuser face opening/closing action for quick access to the commissioning box and duct system
- Powder painted in white, RAL 9003/NCS S 0500-N
- Cleanable ALS commissioning box with removable adjustment damper, measuring method with low systematic error and lined inside with sound absorbing material covered with woven surface layer that prevents fibre migration

Size:      COLIBRI CCb -aaa-bbb-c with  
ALSd -aaa-bbb-c      xx items
